January 16, 2002

Dear Ms. Costello:

We received your January 8, 2002 letter and will try to clear up a few things as best we can.

What you state about the metrology books and pamphlets is not clear to us. You only state that there is no catalog of them and that you will forward all in your possession. This seems vague. Someone must know where George's tangibles at his abode or elsewhere were placed after his death. You told me that the scales were placed with an auctioneer near Springfield. There is no need to list the metrology items individually but merely tell us about how many there are or how many boxes of them you may locate.

As to the items appraised by Mr. Katz there is only one item which is confusing as to its presence, namely item 123. He appraised it so he must have seen it. His comment that it was not located must have been made earlier so it must be there.

You may add #56 to my summary of your list of unlocated items as I only included in my summary 19 such unlocated items and it should be 20.

A suggestion we have to try to clear up any what is there problem is to pack the scales, etc. in containers now and create packing slips using the Mallis-Katz numbers on the packing slip for each container. That will tell you what is in each container. I assume each physical item is identified with the number on the list Mallis prepared. Send us copies of each slip after that is done. The containers need not be sealed at that time. Your memo provisions as now written do not make it clear as to what happens about any shortages if they occur. This should be further clarified or provided for.

As to item 3 g in your memo we called your attention to that typo in item 2 of our October 5, 2001 letter. It has not been corrected yet.

Please let us hear from you promptly as our last letter was not answered for 3 months.

Very truly yours,

Eric P. Newman
